

'SIX/S'

Stangard's Self-Supporting Stainless Steel Solution

(Patent Pending)

The unique, 'SIX/S' Stangard's Self-Supporting Stainless Steel Solution incorporates a modular wall cladding and ceiling panel system, complete with integral lighting.

'SIX/S' features stainless steel framed wall panels having demountable face panels to allow access to run concealed services and access for maintenance. The 60mm thick frames allow a stainless steel self-supporting ceiling to be set on the top trim of the panels without the need for suspension wires from above.

FROM THIS

TO THIS

IN SIX WEEKS!

'SIX/S' is a fast, economic and permanent solution to producing a hygienic wall and ceiling finish to both new and existing kitchen operations.
